

EMPOWERED YOU
TOTAL STAFF COMPENSATION PACKAGE

*At UK HealthCare, YOU are
"The Power of Advanced Medicine."
Without you, we cannot achieve the
excellence in research, clinical care and
education that we strive for every day.*

We want to compensate your dedication with so much more than your salary, because life is more than working for a paycheck. It is your loved ones, your hobbies and passions, and your physical and mental well-being. That is why your total compensation package includes a competitive salary, health and life insurance plans, well-being programs, learning opportunities and much more.

Competitive salaries

A competitive salary is just the foundation of how you are rewarded for being a UK HealthCare team member.

Each individual has a salary based on education, experience and industry market trends for the specified job description. We are committed to fair and equal pay for all of our team members. How do we do this?

- An annual salary survey compares our salaries to those of similar institutions and industries.
- Regular review of position descriptions.
- Assigning the appropriate grade level based on job responsibilities to all new and re-evaluated positions.

Annual salary increases

When conditions allow, the university budgets additional funds for salary increases or for merit increases (distributed based on performance).
